## DIFFERENTIAL PRESSURE GAUGE

# PRESSURE

RUBBER PRESSURE RELIEF PLUG

# Indicate Positive, Negative or Differential, Accurate within 1% calibration services available

Select the **Series 2000 Magnehelic® Differential Pressure Gages** for a versatile low differential pressure gage with a wide choice of 81 models and 27 options to choose from. Using Dwyer's simple, frictionless Magnehelic® gage movement, it quickly indicates air or non-corrosive gas pressures--either positive, negative (vacuum) or differential. The design resists shock, vibration, over-pressures and is weatherproof to IP67.

Select the –HA High Accuracy Magnehelic<sup>®</sup> gage option for an accuracy within 1% of full-scale. Also included with the –HA option at no extra cost are a mirrored scale overlay and a 6 point calibration certificate.

#### BENEFITS/FEATURES

- Easy to read gage through undistorted plastic face permits viewing from far away
  Patented design provides quick response to pressure changes means no delay in assessing critical situations
- Durable and rugged housing and high-quality components combine to provide longservice life and minimized down-time
- · High accuracy option is twice as accurate as the standard Magnehelic® gage

#### APPLICATIONS

- Filter monitoring
- Air velocity with Dwyer pitot tube
- Blower vacuum monitoring
- Fan pressure indication
- Duct, room or building pressures
- Clean room positive pressure indication

ACCESSORIES				
Model	Description			
A-432	Portable kit; combine carrying case with any Magnehelic® gage of			
	standard range, except high pressure connection. Includes 9 ft (2.7			
	m) of 3/16" ID rubber tubing, standhang bracket and terminal tube with holder			
A-605	Air filter gage accessory kit; adapts any standard Magnehelic <sup>®</sup> gage			
	for use as an air filter gage. Includes aluminum surface mounting			
	bracket with screws, two 5 ft (1.5 m) lengths of 1/4" aluminum tubing,			
	two static pressure tips and two molded plastic vent valves, integral			
	compression fittings on both tips and valves			
A-605B	Air filter gage accessory kit; air filter kit with two plastic open/close			
	valves, two 4" steel static tips, plastic tubing and mounting flange			
A-605C	Air filter gage accessory kit; air filter kit with two plastic open/close			
	valves, two plastic static tips, plastic tubing and mounting flange			

#### SPECIFICATIONS

Service: Air and non-combustible, compatible gases (natural gas option available). Note: May be used with hydrogen. Order a Buna-N diaphragm. Pressures must be less than 35 psi.

Wetted Materials: Consult factory.

**Housing:** Die cast aluminum case and bezel, with acrylic cover. Exterior finish is coated gray to withstand 168 hour salt spray corrosion test.

Accuracy: ±2% (-HA model ±1) of FS (±3% (-HA ±1.5%) on -0, -100PA, -125PA, -10MM and ±4% (-HA ±2%) on -00, -60PA, -6MM ranges), throughout range at 70°F (21.1°C).

**Pressure Limits:** -20 in Hg to 15 psig (-0.677 to 1.034 bar); MP option: 35 psig (2.41 bar); HP option: 80 psig (5.52 bar).

Enclosure Rating: IP67.

Overpressure: Relief plug opens at approximately 25 psig (1.72 bar), standard gages only.●

Temperature Limits: 20 to 140°F\* (-6.67 to 60°C). -20°F (-28°C) with low temperature option.

Size: 4" (101.6 mm) diameter dial face.

**Mounting Orientation:** Diaphragm in vertical position. Consult factory for other position orientations.

Process Connections: 1/8" female NPT duplicate high and low pressure taps - one pair side and one pair back.

Weight: 1 lb 2 oz (510 g), MP & HP 2 lb 2 oz (963 g).

Standard Accessories: Two 1/8" NPT plugs for duplicate pressure taps, two 1/8" pipe thread to rubber tubing adaptor, and three flush mounting adapters with screws. (Mounting and snap ring retainer substituted for three adapters in MP & HP gage accessories.)

Agency Approvals: Meets the technical requirements of EU Directive 2011/65/EU (RoHS II). Note: -SP models not RoHS approved.

\*Low temperature models available as special options.

**Note:** For applications with high cycle rate within gage total pressure rating, next higher rating is recommended. See Medium and High pressure options.

## Indicate Positive, Negative or Differential, Accurate within 1% CALIBRATION SERVICES AVAILABLE

### Bezel provides flange for flush mounting in panel.

Clear plastic face is highly resistant to breakage. Provides undistorted viewing of pointer and scale.

Precision litho-printed scale is accurate and easy to read.

**Calibrated range** spring is flat spring steel. Small amplitude of motion assures consistency and long life. It reacts to pressure on diaphragm. Live length adjustable for calibration.

Red tipped pointer of heat treated aluminum tubing is easy to see. It is rigidly mounted on the helix shaft.

Pointer stops of molded rubber prevent pointer over-travel without damage

"Wishbone" assembly provides mounting for helix, helix bearings and pointer shaft.

Jeweled bearings are shock-resistant mounted; provide virtually friction-free motion for helix. Motion damped with high viscosity silicone fluid.

**Helix** is precision made from an alloy of high magnetic permeability. Mounted in jeweled bearings, it turns freely, following the magnetic field to move the pointer across the scale

Zero adjustment screw is conveniently located in the plastic cover, and is accessible without removing cover. O-ring seal provides pressure tightness.

#### O-ring seal for cover assures pressure integrity of case.

#### **OVERPRESSURE PROTECTION**

Blowout plug is comprised of a rubber plug on the rear which functions as a relief valve by unseating and venting the gage interior when over pressure reaches approximately 25 psig (1.7 bar). To provide a free path for pressure relief, there are four spacer pads which maintain 0.023" clearance when gage is surface mounted. Do not obstruct the gap created by these

pads. The blowout plug is not used on models above 180° of water pressure, medium or high pressure models, or on gages which require an elastomer other than silicone for the diaphragm.

The blowout plug should not be used as a system overpressure control. High supply pressures may still cause the gage to fail due to over pressurization, resulting in property damage or serious injury. Good engineering practices should be utilized to prevent your system from exceeding the ratings of any component.

**Die cast aluminum case** is precision made and iridite-dipped to withstand 168 hour salt spray corrosion test. Exterior finished in baked dark gray hammerloid. One case size is used for all standard pressure options, and for both surface and flush mounting

Silicone rubber diaphragm with integrally molded O-ring is supported by front and rear plates. It is locked and sealed in position with a sealing plate and retaining ring. Diaphragm motion is restricted to prevent damage due to overpressures.

Samarium Cobalt magnet mounted at one end of range spring rotates helix without mechanical linkages.

#### VELOCITY AND VOLUMETRIC FLOW UNITS

Scales are available on the Magnehelic<sup>®</sup> gage that read velocity units (FPM, m/s) or volumetric flow units (SCFM, m<sup>3</sup>/h). Stocked velocity units with dual range scales in inc w.c. and feet per minute are shown above. For other ran contact the factory.

When ordering volumetric flow scales please specify maximum flow rate and its corresponding pressure. Example: 0.5 in w.c. = 16,000 CFM.

#### Model Description

Model	Description	
A-135	Rubber gasket for panel mounting	
A-310A	3-way vent valves. In applications where pressure is continuous and the	
	Magnehelic <sup>®</sup> gage is connected by metal or plastic tubing which cannot be	
	easily removed, we suggest using Dwyer A-310A vent valves to connect gage.	
	Pressure can then be removed to check or re-zero the gage	
A-321	Safety relief valve

	parallax error.		
<b>OPTIONS - INTEGRA</b>	TED MOUNTING PLATE		
To order add suffix:	Description		
-AHU1	Furnished with attached surface mounting plate		
-AHU2	Furnished with attached surface mounting plate and including		
	A-481 installer kit (2 plastic static pressure tips and 7'of		
	PVC tubing)		

OPTIONS - FOR HIGH STATE PRESSURE APPLICATIONS			
To order add suffix:	Description		
-HP	High pressure option: for pressures to 80 psig		
-MP	Medium pressure option: for pressures to 35 psig		

OPTIONS	
To order add suffix:	Description
-FC -LT	Factory calibration certificate
-LT	Low temperatures to -20°F (-28°C)
-NIST	NIST traceable calibration certificate
-NIST	NIST traceable calibration certificate

# **MAGNEHELIC® GAGE MOUNTING ACCESSORIES**

MAGNEHELIC

PRESSURE

DIFFERENTIAL

PRESSURE GAUGE

A single case size is used for most models of Magnehelic<sup>®</sup> gages. They can be flush or surface mounted with standard hardware supplied. Complete mounting and connection fittings plus instructions are furnished with each instrument. A 4-9/16" hole is required for flush panel mounting.

Flush mounting is easily accomplished with the new A-300 Flush Mounting bracket. This bracket provides a solution to quickly and conveniently flush mount the Magnehelic<sup>®</sup> gage. The A-300 is ideal for mounting the Magnehelic<sup>®</sup> gage on control panel doors.

The A-368 is a simple bracket for quickly surface mounting the Magnehelic<sup>®</sup> gage. After securing the Magnehelic<sup>®</sup> gage to the A-368 bracket, mount the bracket on any flat surface.

The A-369 allows the Magnehelic® gage to be easily carried to locations where pressure readings need to be taken. The A-369 can stand on its own or hang on a nail or hook.
